

Keep your pets safe from coronavirus

Tips to keep pets healthy

Wash your hands

It is important to wash your hands before and after touching your pets. Don't forget to sing the ABCs or Happy Birthday 2 times.

Physically distance yourself

If you are sick, distance yourself from your pet and have someone healthy care for them.

Fish are okay because they wash their "hands" all day!

Avoid petting or holding

If you are sick, keep your hands off your pets so you don't spread COVID-19. No hugs, kisses, petting, or licking.

Be understanding and loving

Many pets are not used to being inside or away from their friends. They may have accidents or chew on your shoe - be patient - give them lots of love.
