

Microbiology & Immunology

2017-2018 Seminar Schedule

UPDATED: 3-Mar-20

Date	Speaker	Institution	Seminar Title
9/20/2017	Jeremy Boss, PhD	Emory University	"Epigenetic Regulation of Adaptive Immune Responses"
9/27/2017	Darren Perkins, PhD	University of Maryland School of Medicine	"A Novel Prostaglandin Dependent Feedback Loop Restrains MyD88 Independent TLR4 responses during Bacterial Infection"
10/4/2017	Richard Pope, MD	Northwestern University Feinberg School of Medicine	"Rheumatoid Arthritis: Mechanisms for Initiation and Progression"
10/11/2017	Niki Moutsopoulos, DDS, PhD	National Institute of Health	"Host-Microbiome Interactions at the Oral Barrier"
10/18/2017	Christiane Wobus, PhD	University of Michigan Medical School	"New Insights into Norovirus Biology"
10/25/2017	Peggy Cotter, PhD	University of North Carolina at Chapel Hill	"Who's the boss? The <i>Bordetella</i> PlrSR two component regulatory system controls virulence and BvgAS activity in the lower respiratory tract"
11/1/2017	Andrei Medvedev, PhD	University of Connecticut Health	"Regulation of TLR Pathways by IRAK4 and Pellinos"
11/8/2017	Julie Magarian Blander, PhD	Weill Cornell University	"Detecting and Responding to vita-PAMPs: Signatures of Microbial Viability"
11/15/2017	Erol Fikrig, MD	Yale University School of Medicine	"I Don't Believe in Vaccines"
11/29/2017	Paul Love, MD, PhD	National Institute of Health	"THEMIS: Prototype of a New Class of Signal Regulating Molecules"
12/6/2017	David Loane, PhD	University of Maryland School of Medicine	"The Long-term Sequelae of Traumatic Brain Injury: Central versus Systemic Immune Responses"
12/13/2017	Meghan O'Donoghue Altman, PhD	National Institute of Allergy and Infectious Diseases	"Hemagglutinin May Serve as an Immunocomputer Running Influenza's Pandemic Program"
1/24/2018	Sing Sing Way, MD, PhD	Cincinnati Children's Hospital	"Immune Pathogenesis of prenatal infection"
1/31/2018	Stephen Anderson, PhD	Leidos Biomedical Research, Inc.	"The discovery of NK-specific regulation of HLA-C and its implications for NK cell tuning"
2/7/2018	Ken Cadwell, PhD	New York University School of Medicine	"Transkingdom Interactions in the Gut"

Microbiology & Immunology

2017-2018 Seminar Schedule

UPDATED: 3-Mar-20

2/14/2018	Ethan Shevach, MD	National Institutes of Allergy and Infectious Diseases	"Mechanisms of T Regulatory Cell Mediated Immune Suppression"
2/21/2018	Nicholas Zachos, PhD	Johns Hopkins University School of Medicine	"Human Enteroid Models of Innate Epithelial Immunity"
2/28/2018	Marc Hershenson, MD	University of Michigan	"Rhinovirus and Asthma"
3/7/2018	Herve Agaisse, PhD	University of Virginia	"Role of Bacterial Spread from Cell to Cell in Bacillary Dysentery"
3/28/2018	John T. Belisle, PhD	Colorado State University	"Mining the Host Metabolic Response to Infectious Diseases"
4/4/18	Patricia Worsham, PhD	U.S. Army Medical Research Institute of Infectious Diseases	"Yersinia pestis: Pathogenesis and Vaccine Development"
4/11/2018	George Belov, PhD	University of Maryland College Park	"Well-Oiled Machine of Picornavirus Replication. How poliovirus takes advantage of the cellular lipid metabolism"
4/25/2018 *GOIDL*	Marco Colonna, MD	Washington University School of Medicine in St. Louis	"Innate Immunity in Neurodegeneration" "Innate Lymphoid Cells in Immunity"
5/2/2018	Renée Tsois, PhD	University of California, Davis	"How Malaria and Malnutrition Predispose to Invasive Infections with Non-Typhoidal Salmonella"
5/9/2018	Bert Semler, PhD	University of California Irvine School of Medicine	"Exploitation of Nuclear Functions by Cytoplasmic RNA Viruses"
5/16/2018	Daniel Klionsky, PhD	University of Michigan	"The Mechanism and Regulation of Autophagy"
