Congratulations to our very productive faculty on their recent grants and contracts!

- **Ronald Gartenhaus, MD**, associate professor, Department of Medicine, received a four-year $600,000 VA Merit Review Research Award for his work entitled “MEK/ERK Pathways and MCT-1 in Diffuse Large B-cell Lymphoma.”

- **Bret A. Hassel, PhD**, associate professor, Department of Microbiology & Immunology and Program in Oncology, received a one-year $135,000 Maryland Proof of Concept Award entitled “Broad Spectrum Antimicrobial Activity by Pharmacologic Activators of RNase-L.” Additionally, Dr. Hassel received a one-year $134,552 ARRA Administrative Supplement to his National Institute of Allergy and Infectious Diseases R01 Award entitled “Role of the Antiviral Ribonuclease RNase-L in the Host Antibacterial Response.”

- **W. Jonathan Lederer, MD, PhD**, professor, Department of Physiology, and acting director of the Center for Biomedical Engineering and Technology, received a five-year $5,509,888 grant from the National Institute for Heart, Lung and Blood for “Calcium Entrained Arrhythmias.”

- **Igor S. Lukashevich, MD, PhD**, associate professor, Institute of Human Virology and Department of Medicine, received a five-year $4,300,700 award from the National Institute of Allergy and Infectious Diseases (NIAID) for his work entitled “Development of New Bivalent Cross-Protective Arenaviral Vaccines.” The main goal of this project is an advanced development and optimization of alphavirus-based VLPV (virus-like-particle-vectors) technology as a generic platform for preventive vaccines against highly pathogenic arenaviruses, Lassa, Machupo and Junin. Rationally designed vaccine candidates and VLPV technology will be transferred to a manufacturing environment and scaled-up to produce GLP-grade vaccines for preclinical testing in nonhuman primates.

- **Mary C. McKenna, PhD**, associate professor, Department of Pediatrics, and **Gary Fiskum, PhD**, the M. Jane Matjasko Professor for Research and vice-chair for Research, Department of Anesthesiology, received a three-year $2,930,303 P01 National Institute of Child Health and Human Development grant entitled “Metabolic and Developmental Aspects of Intellectual Disability.” Co-investigators include **Margaret McCarthy, PhD**, professor, Department of Physiology, associate dean for Graduate Studies, and interim chair, Department of Pharmacology & Experimental Therapeutics, **Brian Polster, PhD**, assistant professor, Department of Anesthesiology, and **Rao Gullapalli, PhD**, associate professor, Department of Diagnostic Radiology & Nuclear Medicine. The impact of these studies will 1. Greatly improve understanding of the molecular basis for brain cell death and neurologic impairment after transient neonatal asphyxia; 2. Identify similarities and differences between mechanisms of...
neurodegeneration, neuroprotection and neuroregeneration (through endogenous neurogenesis) between males and females; 3. Determine with the aid of magnetic resonance spectroscopy the role of altered energy and neurotransmitter metabolism in neurologic outcome, and; 4. Determine the degree to which acetyl-L-carnitine and estradiol improve long term neurologic outcome, which could lead to neuroprotection clinical trials.

C. Daniel Mullins, PhD, professor, Department of Pharmaceutical Health Services Research, University of Maryland School of Pharmacy, was awarded one of six grants funded by the National Institutes of Health to investigate the best ways to conduct comparative effectiveness research. Elijah Saunders, MD, FACC, FACP, FAHA, professor, Department of Medicine, is also a key investigator on this $1.5 million RC4 methods grant.

Daniel Nagode, BS, graduate student, Department of Physiology, received a two-year $56,381 predoctoral fellowship (F31) grant from the National Institute of Neurological Disorders and Stroke to support his research proposal entitled “Regulation of Cholinergic Transmission and Theta Rhythms by Endocannabinoids.”

Steven Prior, PhD, assistant professor, Department of Medicine, received notice of funding for his sub-award on a National Heart, Lung and Blood Institute R21 grant entitled “Translational Studies of a Novel Cardiovascular Disease Risk Factor: Endothelial Progenitor Cells.”

Alice Ryan, PhD, professor, Department of Medicine, received a VA Merit Pilot entitled “Muscle Atrophy, Physical Performance and Glucose Tolerance Post-Stroke.”

We applaud our colleagues on their recent appointments!

Marc C. Hochberg, MD, MPH, professor, Department of Medicine, and head, Division of Rheumatology & Clinical Immunology, has been appointed as the representative of the Mid-Atlantic Region to the Arthritis Foundation Research Strategy Committee (RSC) for 2011. The scope of the Research Strategy Committee is to represent all regions of the Arthritis Foundation in the design and implementation of the foundation’s research program. RSC members, while representing their region, will consider themselves, above all, as representatives of all people with arthritis.

Steven Silverberg, MD, was honored as professor emeritus in the Department of Pathology. Dr. Silverberg was recruited in 1996 to serve as professor of pathology and director of Anatomic Pathology. He also was later named director of the Pathology Residency Program and medical director of the Pathologists Assistants’ Training Program. He became part-time in 2004 before retiring in 2008.

Dr. Silverberg is the author of Principles and Practice of Surgical Pathology and Cytology. This work was the first to combine both surgical and cytopathology and to make those important interrelationships which are now the standard of care. He is editor of the 4th series of Atlas of Tumor Pathology, and continues as editor-in-chief of Pathology Case Reviews. He is past president of the Association of Directors of Anatomic and Surgical Pathology.

Dr. Silverberg has been particularly involved in the training of residents and fellows. He has directed the work of more than seventy international fellows from a dozen countries. In 2007 the Japanese Division of IAP established an ongoing Silverberg award for lifetime achievement by a Japanese Surgical Pathologist. He has won numerous teaching awards and has been honored for teaching by the American Society for Clinical Pathology with its Harry P. Smith Award in 1997 and the ASCP Master Award in 2008.

Dr. Silverberg has been a key member of the Department of Pathology’s leadership and is recognized internationally as one of the best known anatomic pathologists. He will continue to contribute to the department’s educational and training programs.
Hats off to those who have been published!

- Maria R. Baer, MD, professor, Department of Medicine and Program in Oncology, co-published “Pim-1 Kinase Protects P-Glycoprotein from Degradation and Enables its Glycosylation and Cell Surface Expression” in Molecular Pharmacology, 2010 Aug; 78(2):310-8.

- Irina Balan, PhD, post-doctoral fellow, Department of Anesthesiology, is the first author of the article entitled “Visualization and Quantification of NAD(H) in Brain Sections by a Novel Histo-Enzymatic Nitrotetrazolium Blue Staining Technique” in Brain Research, 2010 1316:112-9. Co-authors include Gary Fiskum, PhD, M. Jane Matjasko Professor for Research and vice-chair for Research, and Tibor Kristian, PhD, assistant professor, both from the Department of Anesthesiology.

- Amber Beitelshees, PharmD, MPH, assistant professor, Department of Medicine, published “Aromatase Gene Polymorphisms are Associated with Survival among Patients with Cardiovascular Disease in a Sex-Specific Manner” in PLoS ONE 5, December 2010 edition.

- Mao Fu, PhD, assistant professor, Department of Medicine, co-published two articles entitled “Association Analyses of 249,796 Individuals Reveal Eighteen New Loci Associated with Body Mass Index” and “Meta-Analysis Identifies 13 Novel Loci Associated with Waist-Hip Ratio and Reveals Sexual Dimorphism in the Genetic Basis of Fat Distribution” in Nature Genetics 42, November 2010 edition.

- Ronald Gartenhaus, PhD, associate professor, Department of Medicine and Program in Oncology, co-published an article entitled “Ribosomal Protein S6 is Highly Expressed in Non Hodgkin Lymphoma and Associates with mRNA Containing a 5’ Terminal Oligopyrimidine Tract” in Oncogene, 2010 Nov 22.

- Tiffany Greco, GPILS PhD Student, and Gary Fiskum, PhD, M. Jane Matjasko Professor for Research and vice-chair for Research, Department of Anesthesiology, co-published “Brain Mitochondria from Rats Treated with Sulforaphane Are

- Five faculty members from the Department of Emergency Medicine contributed chapters to EMS: A Practical Global Guidebook, published by the International Federation for Emergency Medicine in August 2010. Kenneth H. Butler, DO, associate professor, Daniel L. Lemkin, MD, MS, assistant professor, and Benjamin J. Lawner, DO, EMT-P, clinical assistant professor, wrote the airway management chapter. Jon Mark Hirshon, MD, MPH, associate professor, is a co-author of the chapter titled “EMS Health, Safety, and Wellness Issues.” Terrence M. Mulligan, DO, MPH, assistant professor, is the lead author of the chapters titled “Patient Data Records and Patient Handover” and “Parenteral Access: IV, IO, IM, Rectal, Nasal.” The book is the first of its kind, designed as a resource to enhance coordination and communication among emergency medical services groups throughout the world. The 175 contributors represent 15 countries.

- Mao Fu, PhD, assistant professor, Department of Medicine, co-published two articles entitled “Association Analyses of 249,796 Individuals Reveal Eighteen New Loci Associated with Body Mass Index” and “Meta-Analysis Identifies 13 Novel Loci Associated with Waist-Hip Ratio and Reveals Sexual Dimorphism in the Genetic Basis of Fat Distribution” in Nature Genetics 42, November 2010 edition.

- Ronald Gartenhaus, PhD, associate professor, Department of Medicine and Program in Oncology, co-published an article entitled “Ribosomal Protein S6 is Highly Expressed in Non Hodgkin Lymphoma and Associates with mRNA Containing a 5’ Terminal Oligopyrimidine Tract” in Oncogene, 2010 Nov 22.

- Tiffany Greco, GPILS PhD Student, and Gary Fiskum, PhD, M. Jane Matjasko Professor for Research and vice-chair for Research, Department of Anesthesiology, co-published “Brain Mitochondria from Rats Treated with Sulforaphane Are

Bret A. Hassel, PhD, associate professor, Department of Microbiology & Immunology and Program in Oncology, along with Xiao-Ling Li, MD, PhD, research associate, and Heather J. Ezelle, PhD, research associate, both from the Program in Oncology, co-published a review in Wiley Interdisciplinary Reviews: RNA entitled “A Central Role for RNA in the Induction and Biological Activities of Type-1 Interferons.”

Bryan D. Hayes, PharmD, clinical assistant professor, Department of Emergency Medicine, published “Clinical Toxicology Residency and Fellowship Programs for Pharmacists” in the March 15, 2011, issue of the American Journal of Health-System Pharmacy.

Priyantha Herath, MD, fellow, Department of Neurology, co-published an article entitled “In Vitro Neurochemistry of Primary Focal Hand Dystonia: A Magnetic Resonance Spectroscopic Neumometabolite Profiling Study at 3T” in Movement Disorders.

Krishnan Kolappaswamy, BVSc, DACLAM, research associate, Louis J. DeTolla, VMD, PhD, DACLAM, professor and director, Comparative Medicine Program, both from the Department of Pathology, and Ivana Vucenik, PhD, associate professor, Department of Medical Research Technology, co-published an article entitled “Protective Effect of Inositol Hexaphosphate against UVB Damage in HaCaT Cells and Skin Carcinogenesis in SKH1 Hairless Mice” in the February 2011 issue of Comparative Medicine, 61 (1): 39-44.

Tibor Kristian, PhD, assistant professor, Department of Anesthesiology, published an article entitled “Isolation of Mitochondria from CNS” in Current Protocols in Neuroscience, 2010, Chapter 7: Unit 7.22.

Stephen B. Liggett, MD, professor, Departments of Medicine and Physiology, and associate dean for Interdisciplinary Research, and Wayne C.H. Wang, PhD, assistant professor, Department of Medicine, co-authored “Paradoxical Attenuation of β-AR Function in Airway Smooth Muscle by Gi-Mediated Counterregulation in Transgenic Mice Overexpressing Type 5 Adenylyl Cyclase” in the American Journal of Physiology—Lung Cellular and Molecular Physiology, 2010 Dec 3 [Epub ahead of print].

Philip A. Mackowiak, MD, MACP, professor & vice chair, Department of Medicine, published an article entitled “A Modest Proposal” in the December 2010 issue of the BMJ, 2010; 341:c6605. The full article can be accessed on the web at www.bmj.com/content/341/bmj.c6605.

Susanna Scafidi, MD, assistant professor, Department of Pediatrics, is the first author of the article entitled “Neuroprotection by Acetyl-L-Carnitine after Traumatic Injury to the Immature Rat Brain” in Developmental Neurosci-
ence, 2010, 32(5-6):480-7. Co-authors include Mary C. McKenna, PhD, associate professor, Department of Pediatrics, and Gary Fiskum, PhD, M. Jane Matjasko Professor for Research and vice-chair for Research, Department of Anesthesiology. Additionally, Dr. Scafidi as the first author, along with Drs. McKenna and Fiskum, co-authored “Metabolism of Acetyl-L-Carnitine for Energy and Neurotransmitter Synthesis in the Immature Rat Brain” the Journal of Neurochemistry, August 2010 114(3):820-3.

- Sanober Shaikh, MD, senior emergency medicine resident, and Mercedes Torres, MD, clinical assistant professor, both from the Department of Emergency Medicine, published an article on HIV emergencies in the February 2011 issue of Critical Decisions in Emergency Medicine.

- Haiqing Shen, PhD, instructor, Department of Medicine, co-published an article entitled “Familial Defective Apolipoprotein B-100 and Increased Low-Density Lipoprotein Cholesterol and Coronary Artery Calcification in the Old Order Amish” in the Archives of Internal Medicine, 170, November 2010.

- Kevin N. Sheth, MD, assistant professor, Department of Neurology, co-published an article entitled “Factor XIII Deficiency Related Recurrent Spontaneous Intracerebral Hemorrhage: A Case and Literature Review” in Clinical Neurology and Neurosurgery. Additionally, Dr. Sheth co-published “Packed Red Blood Cell Transfusion and Decreased Mortality in Intracerebral Hemorrhage” in the journal Neurosurgery.

- Elizabeth Streeten, MD, associate professor, Department of Medicine, co-published an article entitled “Thirty New Loci for Age at Menarche Identified by a Meta-Analysis of Genome-Wide Association Studies” in Nature Genetics 42, December 2010 edition.

Honors & Awards

Congratulations to the following who have received honors!

- Paul A. Anthony, MD, assistant professor, Department of Pathology, received an FY10 Idea Award from the U.S. Department of Defense Peer Reviewed Cancer Research Program of the U.S. Office of the Congressionally Directed Medical Research Programs for his application on “Mechanisms of Relapsing Cancer and the Origin of Melanoma-Specific Regulatory T Cells.”
We welcome our new faculty!

Kimberly Madsen, MD, joined the Department of Ophthalmology & Visual Sciences as a clinical assistant professor in January 2011. Dr. Madsen received her bachelor’s degree in cellular and molecular biology from the University of Michigan, Ann Arbor. She attended Ohio State University College of Medicine, where she completed her medical degree. She then went to Riverside Methodist Hospital in Columbus, Ohio, to complete her internship. Dr. Madsen received her ophthalmology residency training at the University of Maryland’s Department of Ophthalmology & Visual Sciences. Upon successful completion of her training, she began practicing at Maryland Eye Care, LLC. Dr. Madsen has membership in several international, national and local professional societies such as the American Medical Association, American Academy of Ophthalmology, the Maryland State Medical Society of Eye Physicians and Surgeons, and the Pan-American Association.

Kashif M. Munir, MD, joined the Department of Medicine as an assistant professor in January 2011. Specifically, Dr. Munir will work in the department’s Division of Endocrinology, Diabetes and Nutrition. Previously, Dr. Munir worked at the Baltimore Washington Medical Center as a division chief and medical director of its Joslin Diabetes Center. In 1998 he obtained his medical degree from Temple University School of Medicine. In 2003 he completed both his residency and fellowship training in endocrinology at the University of Maryland Medical Center.

Michael J. Quon, MD, PhD, joined the Department of Medicine as a professor in January 2011. Specifically, Dr. Quon will work in the department’s Division of Endocrinology, Diabetes and Nutrition. Previously, Dr. Quon worked at the National Institutes of Health National Complementary CAM, as chief of the Diabetes Unit. In 1987 he obtained his PhD in biomedical engineering and his medical degree in 1988, both from Northwestern University.

Xiao Jian Sun, PhD, joined the Department of Medicine as an assistant professor in January 2011. Specifically, Dr. Sun will work in the department’s Division of Endocrinology, Diabetes and Nutrition. Previously, Dr. Sun was an assistant professor in the Department of Medicine at the University of Chicago. In 1982 he obtained a Master of Science degree in biochemistry from Shanghai Medical University in 1982, and earned his doctorate in biochemistry at the Chinese Academy of Sciences in 1986.

A job well done to all who have kept us in the media spotlight!

Walter Royal, III, MD, associate professor, Department of Neurology, was quoted in a December 6, 2010, article in the Baltimore Sun regarding a recent disclosure by a local state senator that she has MS. Dr. Royal commented on the benign course of her illness.

George Wittenberg, MD, PhD, associate professor, Department of Neurology, was quoted in the December 16, 2010, issue of Neurology Today in “Stem Cells with Curcumin Reportedly Help Heal Spinal Cord.”
Kudos to our colleagues who are experts in their fields and give their all to represent the School of Medicine!

- **Gorgun Akpek, MD, MHS**, associate professor, Department of Medicine, presented “Spleen Status and Engraftment after Allogeneic Hematopoietic Stem Cell Transplantation” at the 2010 American Society of Hematology Meeting in Orlando.

- **Amber Beitelshees, PharmD, MPH**, assistant professor, Department of Medicine, moderated the session “Genomics and Pharmacogenomics: Platelet Reactivity, Antiplatelet Drugs and Warfarin” at the 2010 American Heart Association Scientific Sessions in Chicago in November 2010.

- **France Carrier, PhD**, associate professor, Department of Radiation Oncology, was invited to speak by the Cambridge Healthtech Institute at the Eighth International Discovery on Target meeting in Boston in November 2010. Her talk was entitled “The Inherent Epigenetic Makeup of Cancer Cells Predisposes Them to HDAC Inhibitors Sensitization to Conventional Anticancer Therapies.”

- **John W. Cole, MD, MS**, associate professor, Department of Neurology, sat on the steering committee as well as presented 10 lectures for the course entitled “Catheter Lysis of Thromboembolic Stroke (CLOTS)” for the Society of Interventional Radiology in Dallas in October 2010.

- **Raymond K. Cross, MD, MS**, associate professor, Department of Medicine, and **Mark H. Flasar, MD, MS**, assistant professor, Department of Medicine, co-directed the 6th University of Maryland School of Medicine Inflammatory Bowel Disease Symposium, “Update in Inflammatory Bowel Disease,” at the Baltimore Inner Harbor Marriott in November 2010. In addition to co-directing the course, Drs. Cross and Flasar presented “Biologic Therapy in IBD” and “Optimal Management of Mild to Moderate Crohn’s Disease,” respectively. **Leyla Ghazi, MD**, assistant professor, Department of Medicine, presented “Women’s Health Issues in IBD” and **Andrea Bafford, MD**, assistant professor, Department of Surgery, presented “Optimal Surgical Management in a Patient with IBD.”

- **Alessio Fasano, MD**, professor, Departments of Pediatrics, Medicine and Physiology, and director of the Mucosal Biology Research Center and the University of Maryland Center for Celiac Research, presented “Biological Approaches to Epithelial Barrier Repair” at the Gut Integrity Meeting, sponsored by the Bill & Melinda Gates Foundation and held in Seattle in December 2010.

At the same meeting, **Myron “Mike” Levine, MD, DTPH**, Simon and Bessie Grollman Distinguished Professor, Department of Medicine, and director of the Center for Vaccine Research and head of the Division of Geographic Medicine, presented “The Burden of Disease.” The goal of the Gut Integrity Meeting is to facilitate a detailed examination and discussion of gutmucosal integrity in children of resource-poor countries to better understand the causes and effects of barrier dysfunction, nutrition transport and metabolic abnormalities.

- **Alina Grigore, MD**, associate professor, Department of Anesthesiology, presented “Intraoperative Echo for Ventricular Assist Devices” at the Intraoperative Transeosophageal Echocardiography Workshop, in Houston, Texas in January 2011. Also in January, Dr. Grigore presented at the Periop Management of Hypercoagulable States 29th
Events, Lectures & Workshops continued

Annual Symposium, “Clinical Update in Anesthesiology, Surgery and Perioperative Medicine,” in the French West Indies.

► Tibor Kristian, PhD, assistant professor, Department of Anesthesiology, presented a lecture entitled “Mitochondrial Dysfunction and NAD+ Catabolism as Mechanisms of Cell Death and Promising Targets for Neuroprotection” at the 9th International Conference on Brain Energy Metabolism in Budapest in July 2010.

► Walter Royal, III, MD, associate professor, Department of Neurology, was the keynote speaker for the Martin Luther King, Jr. celebration at Dartmouth Medical School on January 27, 2011. Dr. Royal presented “Roads Well Traveled for Improving Healthcare for the Underserved—Are We There Yet?”

► Elijah Saunders, MD, FACC, FACP, FAHA, professor, Department of Medicine, was key speaker and chair of the advisory board for the Maryland Cardiovascular Promotion Program on September 27, 2010. The program, held at the Forest Park Golf Course, was sponsored by CareFirst to increase public awareness. After the program, a press conference was held with many members of the local media.

► Rosemary A. Schuh, PhD, assistant professor, Department of Neurology, presented a poster, “Mitochondrial Dysfunction and Amyloid Plaque Burden in an APP/PSI Mouse Model of Alzheimer’s Disease” at the Society for Neurosciences in San Diego in November 2010. Co-authors included Paul S. Fishman, MD, PhD, professor, Department of Neurology, and Tibor Kristian, PhD, assistant professor, Department of Anesthesiology.

► Alan R. Shuldiner, MD, Whitehurst Professor of Medicine, and Head, Division of Endocrinology, Diabetes and Nutrition, presented the Khairallah Memorial Lecture, which was entitled “Genome-wide Association Studies of the Old Order Amish and Metabolic Disease,” at the University of Connecticut in Storrs, Connecticut, in September 2010.

► Jing Tian, BM, PhD, research associate, Department of Medicine, and Nancy R. Lowitt, MD, MED, associate dean for Faculty Affairs and Professional Development and assistant professor, Department of Medicine, conducted a small group discussion workshop, “Outcomes Research in CME—Adapting a Reliable and Validated Assessment Tool for Use at Your Institution,” at the Association for American Medical Colleges 2010 Annual Meeting in Washington, DC, in November 2010.
