Congratulations to our very productive faculty on their recent grants and contracts!

- **Maria Baer, MD**, Professor, Department of Medicine, received a four-year, $600,000 Merit Review Award from the Veterans Administration for “Inhibition of Pim Kinases in Acute Myeloid Leukemia.”

- **Sarah Boudova, BA, MS**, a MD/PhD student in the Molecular Microbiology & Immunology program working in the Center for Vaccine Development under **Miriam Laufer, MD, MPH**, Associate Professor, Department of Pediatrics, received a three-year, $109,506 F30 Individual Pre-doctoral MD/PhD Fellowship from the National Institute of Allergy and Infectious Diseases for “The Effect of Malaria During Pregnancy on Infant Susceptibility to Malaria.” This individual training grant was awarded with one year of PhD and two years of MD support. The purpose of the F30 is to support promising pre-doctoral applicants who have the potential to become highly productive researchers in their fields.

- **Jeffrey Deiuliis, PhD**, Assistant Professor, Department of Medicine, has received a one-year KO-1 grant for $427,200 from the National Institute of Diabetes and Digestive and Kidney Diseases (NIH/NIDDK) for “Adipose microRNAs in Insulin Resistance.” Dr. Deiuliis was also recently awarded a one-year, $30,000 renewable intramural grant by the University of Maryland Claude D. Pepper Older Americans Independence Center (UM-OAIC) Leadership Committee for “Circulating MicroRNAs in Older Adults.”

- **Howard Dubowitz, MB, ChB, FAAP**, Professor, Department of Pediatrics, received a nine-month, $100,000 grant from the Maryland Technology Development Corporation (TEDCO) for “The Safe Environment for Every Kid (SEEK) Model: Using Software Innovation to Prevent Child Abuse and Help Promote Children’s Health, Development and Safety.”

- **Michael Grasso, MD, PhD, FACP**, Assistant Professor, Department of Medicine, has received two preliminary grants from the Northrop Grumman Corporation and the Arthritis Foundation for $19,000 and $32,000, respectively. The goal of this research is to develop new analytical approaches, optimized for Big Data, which can be applied to disease prediction and treatment efficacy.

- **Ronna Hertzano, MD, PhD**, Assistant Professor, Surgeon-scientist, Department of Otorhinolaryngology Head and Neck Surgery, has been awarded a $1.5 million grant from the Department of Defense for the project “Towards a Molecular Understanding of Noise-Induced Hearing Loss.” The grant applies genetically modified mice to perform cell type-specific translome analysis using RNA-sequencing and is a collaboration between the UMSOM, College Park (Didier Depireux, PhD), and the Netherlands Cancer Institute (Ran Elkon, PhD).

- **Wendy Lane, MD, MPH**, Clinical Assistant Professor, Department of Epidemiology & Public Health, received a one-year, $39,807 award from Kennedy Krieger Institute to take part in “The Baltimore Citywide Child Protection Team.”

- **A-Lien Lu-Chang, PhD**, Professor, Department of Biochemistry & Molecular Biology, has been awarded a two-year grant from Maryland Stem Cell Research Fund to research “The Effect of Histone Deacetylation and DNA Methylation on Somatic Cell Reprograming.”
Sandra Mooney, PhD

Laurence Magder, PhD, Professor, Department of Epidemiology & Public Health, received a four-year $102,198 award from the National Science Foundation for collaborative research on “Modeling Disease Trajectories in Patients with Complex, Multi-phenotypic Conditions.”

Anup Mahurkar, Executive Director, Software Engineering & IT, Institute for Genome Sciences, has been awarded $250,687 from the National Science Foundation for his collaborative research entitled “ABI Development: VIROME, Bioinformatics Cyberinfrastructure for the Next Wave of Scientific Advancements in Microbiome Research.” The three-year award started July 1, and is in collaboration with the University of Delaware.

Andrei Maiseyeu, PhD, Assistant Professor, Department of Medicine, has received an award in the amount of $77,000 from the American Heart Association for “Nanoparticle-Aided Modulation of Inflammation in Atherosclerosis.”

Sandra Mooney, PhD, Associate Professor, Department of Pediatrics, has received a sub-award in the amount of $314,000 over five years for Main Project 5, a study on the effects of developmental exposure to alcohol. The sub-award is part of a five-year, $8,100,000 grant from the National Institute on Alcohol Abuse and Alcoholism (NIAAA) to the Developmental Exposure Alcohol Research Center (DEARC) at Binghamton University in New York.

Toni Pollin, MS, PhD, Associate Professor, and Alan Shuldiner, MD, the John L. Whitehurst Endowed Professor, both from the Department of Medicine, have received a four-year, $314,000 award from the National Human Genome Research Institute (NHGRI) for “Genomic Diagnosis and Individualized Therapy of Highly Penetrant Genetic Diabetes.” Dr. Shuldiner is also Associate Dean for Personalized & Genomic Medicine and Director of the Program in Personalized Medicine.

Lynn Schriml, PhD, Assistant Professor, Department of Epidemiology & Public Health and the Institute for Genome Sciences, has received a four-year sub-award from The Scripps Research Institute for $259,844, funded by NIGMS/NIH, for collaborative Disease Ontology research entitled “Gene Wiki: Expanding the Ecosystem of Community-Intelligence Resources.” The project is in collaboration with Andrew Su (PD/PI) from The Scripps Research Institute and will involve the expansion of standardized disease content and disease-gene-drug target content within the Wikipedia and Wikidata resources. The award started July 15 and will run through April 30, 2018.

Nirav Shah, MD, FCCP, Assistant Professor, Department of Medicine, received a five-year, $1,070,568 Career Development Award from the Department of Veterans Affairs for “Temperature-Dependence of Endothelial Barrier Functions in Acute Lung Injury,” under the mentorship of department colleagues Jeffrey Hasday, MD, Professor; Sergei Atamas, MD, PhD, Associate Professor; and Simeon Goldblum, MD, Professor. Dr. Goldblum also received a 4 year, $649,954 Merit Review grant from the Department of Veterans Affairs for “NEU1 Sialidase Disrupts CD31-Driven Angiogenesis in Human Lung Endothelia.”

Raphael Simon, PhD, Assistant Professor, Department of Medicine, received a three-year, $379,000 award from the National Institute of Allergy and Infectious Diseases for “Exploration of Protective Immunity Induced by Salmonella Cops: FLIC Conjugates.”

Soren Snitker, MD, PhD, Associate Professor, Departments of Medicine and Pediatrics, was awarded $83,688 through the National Institutes of Health’s Pharmacogenetics Research Network (U01 GM074518). The purpose of the funding is to perform RNA-sequencing of Dr. Snitker’s adipose tissue samples from his project “Pharmacogenomics of Thiazolidinedione Response (R01 DK074828).”

Diane-Marie St. George, PhD, Assistant Professor, Department of Epidemiology & Public Health, has received a $21,940, one-year award from the Baltimore City Health Department to serve as an administrative agent for the Baltimore City Cancer Health Equity Coalition.

Zhekang Ying, PhD, Assistant Professor, Department of Medicine, received a $1.6 million, five-year grant from the National Institutes of Health for a new RO-1 titled “Hypothalamic Inflammation in Insulin Resistance.”

The Genomics Resource Center at the Institute for Genome Sciences has received a two-year, $1.6M contract funded by FDA to sequence, assemble and annotate a population of bacterial pathogens. The GRC is led by Luke Tallon, Scientific Director, and Lisa DeShong Sadzewicz, PhD, Administrative Director.
Hats off to those who have been published!

- **Soren Bentzen, PhD, DMSc**, Professor, Department of Epidemiology & Public Health, was among the co-authors on “Long-Term Results of a Randomized Trial in Locally Advanced Rectal Cancer: No Benefit From Adding a Brachytherapy Boost” in International Journal Of Radiation Oncology, Biology, Physics, 2014 Sep 1;90(1):110-8; “Recurrences After Intensity Modulated Radiotherapy for Head and Neck Squamous Cell Carcinoma More Likely to Originate From Regions With High Baseline” in Radiotherapy and Oncology: Journal Of The European Society For Therapeutic Radiology And Oncology, 2014 Jun;111(3):360-5; “Cancer Risk From Bone Morphogenetic Protein Exposure in Spinal Arthrodesis” in The Journal Of Bone And Joint Surgery, American Volume, 2014 Sep 3;96(17):1417-22; and “Randomized Trial of Hyperfractionation Versus Conventional Fractionation in T2 Squamous Cell Carcinoma of the Vocal Cord (RTOG 9512)” in the International Journal Of Radiation Oncology, Biology, Physics. 2014 Aug;89(5):958-963.

- **Lindsay Black, PhD**, Professor, Department of Biochemistry & Molecular Biology, was among the co-authors on “Viral Nanoparticle-Encapsidated Enzyme and Restricted DNA for Cell Delivery and Gene Expression” in Proceedings of the National Academy of Sciences USA, 2014 Sep;111(37):13319–13324.

- **Maureen Black, PhD**, the John A. Scholl, MD, and Mary Louise Scholl, MD, Professor, and **Kristen Hurley, PhD, MPH**, Clinical Assistant Professor, both from the Department of Pediatrics, co-authored “Investing in Early Childhood Development” in The Lancet, 2014 Jun 16;S0140-6736(14)60607-3. Dr. Black and **Stacy Buckingham-Howes, PhD**, Postdoctoral Fellow, Department of Pediatrics, were among the co-authors on “Relations Between Prospective Memory, Cognitive Abilities, and Brain Structure: Findings from a Longitudinal Study Examining Effects of Prenatal Drug Exposure During Adolescence” in the Journal of Experimental Child Psychology, 2014; 127, 144-162; and “Prenatal Drug Exposure Moderates the Association Between Stress Reactivity and Cognitive Function in Adolescence” in Developmental Neuroscience, 2014;36(3-4):329-337. Those two, along with **Prasanna Nair, MBBS, MPH**, Professor and **Yan Wang, MD, DrPH**, Assistant Professor, also from the Department of Pediatrics, and **Laurence Magder, PhD**, Professor, Department of Epidemiology & Public Health, were among the co-authors on “Prenatal Drug Exposure, Behavioral Problems, and Drug Experimentation Among African-American Urban Adolescents” in the Journal of Adolescent Health, 2014; 55(3):423-31. Dr. Black, Dr. Nair and **Adam Spanier, MD, PhD**, Associate Professor, Department of Pediatrics, were the co-authors on “Dose and Timing of Prenatal Tobacco Exposure: Treats to Early Child Development” in The Lancet Respiratory Medicine, 2014 Sep;2(9):677-679.

- **Vasken Dilsizian, MD**, Professor, Diagnostic Radiology & Nuclear Medicine, was among the co-authors on “PET-Determined Hyperemic Myocardial Blood Flow: Further Progress to Clinical Application” in the Journal of the American College of Cardiology, 2014 Oct;64(14):1476-1478.

- **Alex Drohat, PhD**, Associate Professor, Department of Biochemistry & Molecular Biology, was among the co-authors on “Mechanisms for Enzymatic Cleavage of the N-glycosidic Bond in DNA” in Organic & Biomolecular Chemistry, 2014 Sep 2 [Epub ahead of print].

- **Matthew Frieman, PhD**, Assistant Professor, Department of Microbiology & Immunology, was among the co-authors on “Repurposing of Clinically Developed Drugs for Treatment of Middle East Respiratory Syndrome Coronavirus Infection” in Antiviral Agents and Chemotherapy, 2014 Aug;58(8):4885-93, and “Evaluation of SSYA10-001 as a Replication Inhibitor of Severe Acute Respiratory Syndrome, Mouse Hepatitis, and Middle East Respiratory Syndrome Coronaviruses” in the same issue (2014 Aug;58(8):4894-8.). He also was among the co-authors on “Purified Coronavi-

- Tracy Hazen, PhD, Postdoctoral Fellow, and David Raske, PhD, Associate Professor, both from the Department of Microbiology & Immunology and the Institute for Genome Sciences, were among the co-authors on “Whole Genome Assembly of Klebsiella pneumoniae Co-Producing NDM-1 and OXA-232 Carbapenemases Using Single-Molecule, Real-Time Sequencing” in Antimicrobial Agents and Chemotherapy, 2014 Oct;58(10):5947-53.

- David Kaetzel, PhD, Professor, Department of Biochemistry & Molecular Biology, was among the co-authors on “The Metastasis Suppressor NME1 Regulates Expression of Genes Linked to Metastasis and Patient Outcome in Melanoma and Breast Carcinoma” in Cancer Genomics Proteomics, 2014 07-08;11(4):175-194. He was also first author on “Dual Functions of NME1 in Suppression of Cell Motility and Enhancement of Genomic Stability in Melanoma” in Naunyn Schmiedebergs Archives of Pharmacology, 2014 Jul 15 [Epub ahead of print].

- Abdul Kazi, PhD, Assistant Professor; Thomas MacVittie, PhD, Professor; Giovanni Lasio, PhD, Assistant Professor; Wei Lu, PhD, Associate Professor; and Karl Prado, PhD, Professor, all from the Department of Radiation Oncology, were among the co-authors on “Response to Zeman” in Health Physics, 2014 Oct;107:356–358.

- Seth Kligerman, MD, Assistant Professor; Jean Jeudy Jr., MD, Associate Professor; and Charles White, MD, Professor, all from the Department of Diagnostic Radiology & Nuclear Medicine, were among the co-authors on “Improved Accuracy of PE-CAD Using Iterative Reconstruction Compared to Filtered Back Projection” in the American Journal of Roentgenology, 2014 Oct;203(4):763-71.
the buzz

**Publications continued**

Sciences, were the authors of “Mobile Elements and Viral Integrations Prompt Considerations For Bacterial DNA Integration as a Novel Carcinogen” in *Cancer Letters*, 2014 Oct 1;352(2):137-44.

Lynn Schriml, PhD, Assistant Professor, Department of Epidemiology & Public Health; Vincent Bruno, PhD, Assistant Professor, Department of Microbiology & Immunology; Claire Fraser, PhD, Professor, Departments of Medicine, Microbiology & Immunology, Director of the Institute for Genome Sciences; Julie Dunning Hotopp, PhD, Associate Professor, Department of Microbiology & Immunology; Emmanuel Mongodin, PhD, Assistant Professor, Department of Microbiology & Immunology; David Rasko, PhD, Associate Professor, Department of Microbiology & Immunology; Lisa Sadzewicz Deshong, PhD, Administrative Director; Joana Carneiro da Silva, PhD, Assistant Professor, Department of Microbiology & Immunology; Luke Tallon, Scientific Director, Genome Research Center; and Owen White, PhD, Professor, Department of Epidemiology & Public Health and Associate Director, Bioinformatics, all also from the Institute for Genome Sciences, were among the co-authors on “Standardized Metadata For Human Pathogen/Vector Genomic Sequences” in *PLoS One*, 2014 Jun 17;9(6):e99979. Drs. Mongodin and Fraser were also among the co-authors on “*Borrelia*Base: A Phylogeny-Centered Browser of *Borrelia* Genomes” in *BMC Bioinformatics*, 2014 Jul 3;15(1):233.

Zeljko Vujaskovic, MD, PhD, Professor, Department of Radiation Oncology, was among the co-authors on “Two Phase I Dose-Escalation/Pharmacokinetics Studies of Low Temperature Liposomal Doxorubicin (LTLDD) and Mild Local Hyperthermia in Heavily Pretreated Patients With Local Regionally Recurrent Breast Cancer” in the *International Journal of Hyperthermia*, 2014 Aug;30:285–294.

Lynn Schriml, PhD

Lewis Rubinson, MD, PhD

Zeljko Vujaskovic, MD, PhD

Thanks to those who selflessly donate their time, talent and resources. Your goodwill does not go unappreciated.

Karen Beasley, MD, Clinical Assistant Professor, Department of Dermatology, was Event Chair for the “Play Safe in the Sun” outreach program at the LPGA International Crown tournament in Owings Mills, MD, in July. She and Dermatology residents Ebaa Alawami, MBBS, MSc (PGY-3), Anna Chacon, MD (PGY-2) and Christian Halvorson, MD, Chief Resident, spent two days volunteering at the Women’s Dermatological Society booth with other dermatologists from Maryland and DC, spreading the word about the importance of sun protection and offering free skin exams and counseling for patrons of the LPGA tournament.

Lewis Rubinson, MD, PhD, Associate Professor of Medicine and Director of the Critical Care Resuscitation Unit at the R Adams Cowley Shock Trauma Center, has deployed to Sierra Leone as a consultant for the World Health Organization. Dr. Rubinson is assisting with the clinical response to the devastating outbreak of Ebola viral disease that continues to ravage West Africa.

The University of Maryland School of Medicine’s Student National Medical Association (SNMA) continued its tradition of community outreach with their 12th annual Charm City Health Fair, which took place on Saturday, September 20th, at Lexington Market in Baltimore. SNMA members worked with over 30 vendors to provide information about eating healthy, exercise, urban agriculture and insurance. Students from the Student National Dental Association, the Student National Pharmaceutical Association and the Department of Physical Therapy and Rehabilitation Sciences also participated. Booths provided interactive activities for children, eye screenings, oral cancer and blood pressure screenings, as well as a Zumba and a Yoga class. Over 300 community members participated in the fair.
Congratulations to the following who have received honors!

- **Mike Benitez, MD**, Professor, Department of Medicine, Division of Cardiovascular Medicine, was awarded the Theodore E. Woodward Teaching Award by the Department of Medicine in May, in recognition of his teaching excellence.

- **Matthew Frieman, PhD**, Assistant Professor, Department of Microbiology and Immunology, has received the Innovator of the Year award from The Daily Record. Dr. Frieman was recognized for his work on developing therapeutics for the Middle East Respiratory Syndrome Coronavirus (MERS-CoV). The Innovator of the Year award is a way to recognize Marylanders and Maryland-based companies for their innovative spirit in creating new products, new programs, new services or new processes that have helped their companies, industries or communities.

- **Bryan Hayes, PharmD**, Clinical Assistant Professor, Department of Emergency Medicine, has been awarded fellowship status by the American Academy of Clinical Toxicology. This highest level of peer recognition within the organization acknowledges longstanding commitment to the field of toxicology and to the Academy.

- **W. Jonathan Lederer, MD, PhD**, Professor, Department of Physiology, and Director of the Center for Biomedical Engineering and Technology (BioMET), has been selected as the co-recipient (with Dr. Roberto Bolli from the University of Louisville) of the 2015 Peter Harris Distinguished Scientist Award of the International Society for Heart Research (ISHR). The award will be bestowed during the 2015 ISHR European Section meeting in Bordeaux, France from July 2–5, 2015. As a recipient of this award, Dr. Lederer will present a major lecture and receive $3,000 and a plaque. An announcement of the Award, along with a photograph and a biosketch, will be published in Heart News and Views and posted on the ISHR website. Dr. Lederer will also prepare a review article based on his lecture that will be published in the Journal of Molecular and Cellular Cardiology, published by the ISHR. The full details of the award are available on the ISHR website at www.ishrworld.org.

- **Myung Park, MD**, Associate Professor, Department of Medicine, received the Physician Colleague Award at the annual UMB Nurses’ Week Awards Event on May 7.

- **Nirav Shah, MD, FCCP**, Assistant Professor, Department of Medicine has been designated a Fellow in the American College of Chest Physicians. The FCCP designation signifies achievement of excellence in the field of Pulmonary and Critical Care Medicine.

- **Gautum Ramani, MD**, Assistant Professor, Department of Medicine, was awarded the Gary Plotnick, MD Teacher of the Year Award in May 2014 by the Division of Cardiovascular Medicine.

- **Kari Ann Shirey, PhD**, Assistant Professor, Department of Microbiology & Immunology was awarded the Theresa L. Gioannini Women in Science Travel Award for the October 2014 meeting of The Society for Leukocyte Biology and The International Endotoxin and Innate Immunity Society. **Rajesh Rajaiah, PhD**, and **Darren Perkins, PhD**, Research Associates in the department, received travel awards for the same meeting.

- **Stefanie Vogel, PhD**, Professor, Department of Microbiology & Immunology, will share the 2014 Seymour & Vivian Milstein Award of the International Cytokine and Interferon Society (ICIS). This award represents the “pinnacle of scientific achievement in interferon and cytokine research.” (http://www.milstein-award.org/about-the-milstein-award/).

In the News

**A job well done to all who have kept us in the media spotlight!**

- **Randi Cohen, MD, MS**, Assistant Professor, Department of Radiation Oncology, was profiled in the September 2 issue of Maryland Physician, in an article titled “Clinical Trials Propel Cancer Breakthroughs.” The article is available at: http://umm.gd/1sXFTiv.

- **Steven Gambert, MD**, Professor, Department of Medicine and Co-Director of the Division of Gerontology and Geriatric Medicine, appeared on Maryland Public Television’s Direct Connection on June 30. He was featured in the “Your Health” segment, where he discussed the topic of successful aging.

- **Jacques Ravel, PhD**, Professor, Department of Microbiology & Immunology and Associate Director of Genomics, Institute for Genome Sciences, was quoted in The Scientist on May 19 in an article about characterizing the healthy vagina.
Kudos to our colleagues who are experts in their fields and give their all to represent the School of Medicine!

- **Cynthia Bearer, MD**, the PhD, Mary Gray Cobey Professor of Neonatology, Department of Pediatrics, was selected to give open public comments on “Is Chlorhexidine Safe for Preterm Babies?” at the FDA hearing on the Non-prescription Drugs Advisory Committee.

- **Raymond Cross, MD, MS, AGAF**, Associate Professor, Department of Medicine, presented at the inaugural IBD 2020 meeting, held in New Orleans, LA, in early May. The topic of his talk was “Can Telemedicine Be Used for IBD care?” He also presented on “Biologic Therapies in IBD” at the Maryland Academy of Family Physicians meeting in Frederick, MD, in June; and on “Prognostication in IBD: Can We Really Predict the Future or Are We Just Describing the Past?” at the “Mastering Clinical Challenges and Emerging Therapies in IBD: Individualizing our Approach to IBD” symposium, held in Chicago in July.

- **Colleen Hughes Driscoll, MD**, Assistant Professor, Department of Pediatrics, was recently the guest speaker at the Johns Hopkins School of Medicine Division of Neonatology’s City Wide Conference where she presented “Healthcare Quality Improvement and Patient Safety: Directions at the University of Maryland Medical Center Neonatal Intensive Care Unit.”

- **Ann Farese, MS**, Assistant Professor, Department of Radiation Oncology, was invited to present “Medical Countermeasure Development Following the FDA Animal Rule: Efficacy of Neupogen and Neulasta in Rhesus Macaques Experiencing the Hematopoietic Syndrome of the Acute Radiation Syndrome” as part of a symposium on “Medical Countermeasures Against the Acute Radiation Syndrome” at the 60th Annual Radiation Research Society Meeting held in Las Vegas, NV, from September 21-24.

- **Claire Fraser, PhD**, Professor, Departments of Medicine, Microbiology & Immunology and Director, Institute for Genome Sciences, was one of the speakers at the NIH Common Fund 10th Anniversary Symposium on June 19.

- **Feng Jiang, MD, PhD**, Associate Professor, and **Sanford Stass, MD**, Professor and Chair, both from the Department of Pathology, presented “Small RNA Biomarkers for Identifying Lung Cancer in Indeterminate Solitary Pulmonary Nodules” at the 9th NIH Early Detection Research Network Scientific Workshop “Biomarkers at a Crossroad in Personalized Cancer Risk Assessment and Detection” in Bethesda, MD, in September.

- **Philip Mackowiak, MD, MACP**, Professor, Department of Medicine and the Carolyn Frenkil and Selvin Passen History of Medicine Scholar-in-Residence, presented a talk on “Mary Shelley, Frankenstein and the Dark Side of Medical Science” at the Annual Exhibit and Opening of the American Urological Association Museum in Linthicum, MD on July 24.

- **Amal Mattu, MD**, Professor, Department of Emergency Medicine, was the grand rounds lecturer at the University of South Florida in Tampa on August 28. He presented “Everyday Leadership: Secrets of Great Minds Through the Ages” for the emergency medicine program and “Low Risk Chest Pain: Mythology, Mortality, and Malpractice” for the internal medicine program. Dr. Mattu also presented two lectures for emergency medicine grand rounds at Madigan Army Medical Center in Tacoma, Washington, on September 3. The titles of his talks were “Deadly Arrhythmias” and “Everyday Leadership: Secrets of Great Minds Through the Ages.”

- **Michelle Pearce, PhD**, Assistant Professor, Department of Family & Community Medicine, will be the director of a new online graduate certificate program in The Graduate School called “Death, Dying, and Mourning: Applied Thanatology.” This 12-credit, three-course online program can be completed over the span of one year and is ideal for healthcare professionals. Participants will acquire knowledge, sensitivity, and advanced skills for providing specialized care for those dealing with death, dying, and grief. Registration is now open, and the first course begins in January. More information is provided on the website at http://www.grad.umsystem.edu/thanatology/index.html.

- **Soren Snitker, MD, PhD**, Associate Professor, Departments of Medicine and Pediatrics, gave Inter-institutional Endocrine Grand Rounds at the National Institutes of Health on April 11, on an invitation by Dr. Kong Y. Chen.

- **Stefanie Vogel, PhD**, Professor, Department of Microbiology & Immunology presented “Novel Host-oriented Treatments of Viral Respiratory Infections” at the Norwegian University of Science and Technology in Trondheim, Norway.
We welcome our new faculty!

**Wuqaas Munir, MD**, joined the Department of Ophthalmology & Visual Sciences in August 2014 as an Associate Professor and Chief of Ophthalmology at the Baltimore VA Medical Center. Dr. Munir received his medical degree in 2001 from the University of Pittsburgh School of Medicine. He completed his Ophthalmology residency in 2005 at the University of Illinois at Chicago, followed by a fellowship in Cornea, External Disease, and Refractive Surgery at the Bascom Palmer Eye Institute at the University of Miami in 2006. Dr. Munir then served as Assistant Professor for eight years at the Boston University School of Medicine, where he also functioned as the Director of the Cornea Service as well as Cornea fellowship director. Dr. Munir specializes in complex cataract surgery and lamellar (partial-thickness) corneal transplant surgery. He also performs refractive surgery such as LASIK.

We applaud our colleagues on their recent appointments!

**Cynthia Bearer, MD**, the Mary Gray Cobey Professor of Neonatology, Department of Pediatrics, has been appointed to be the American Society of Pediatrics’ representative to the Pediatric Policy Council (PPC). The PPC is a well-established group comprised of two representatives from each constituent society: the American Pediatric Society (APS), the Society for Pediatric Research (SPR), the Association of Medical School Pediatric Department Chairs (AMSPDC), and the Academic Pediatric Association (APA). PPC members serve simultaneously as representatives to the AAMC Council of Faculty and Academic Societies and as representatives to the AAP Committee on Federal Government Affairs (COFGA). The PPC also works with the Washington Coordinator in the American Academy of Pediatrics’ Department of Federal and Government Affairs.

**Mukta Srivastava, MD**, Assistant Professor, Department of Medicine, has been appointed Director of Quality for the Division of Cardiovascular Medicine.
