

Volunteer for Research on Brain and Movement

We are looking for patients (ages 18-88) who had stroke over 6 months ago that caused weakness in one arm and who can undergo an MRI exam. Eligible participants will receive robotic therapy for their arm while scalp-based brain imaging data is collected. Participation includes coming for 3 visits a week for 3 weeks of arm training, plus an intake, MRI, and exit assessment. Patients will receive \$60 for completing the assessments. Call 410-706-4950, UMB Neurology, 655 W Baltimore St. PI: Robynne Braun, MD, PhD
