

Strengthening disability benefit, work & school services in early psychosis

Researchers in Pennsylvania & Maryland are conducting interviews to deepen our understanding of family member perspectives on factors influencing the outcomes of individuals with early psychosis, and barriers and opportunities in early psychosis services.

Who is eligible to participate?

Close family members of individuals receiving specialized early psychosis services (i.e. early intervention in psychosis, Coordinated Specialty Care or similar programs). Family members may participate with or without their service user.

Participants will be compensated \$60 for their involvement.
