

Understanding Content Types

- Content types are like building blocks for your webpage. They help you you to add a variety of different types of content to a Section or webpage.
- A content type usually includes styling and alignment information to streamline the addition of text, images and other media.
- The order of the content types (from top to bottom) determines where the content appears on the webpage.

Content Type Examples include:

- HTML Content (Text)
- Image and Caption
- YouTube Video
- Staff Lists
- Horizontal Line

Content currently in this section.
