

The University of Maryland School of Medicine (UMSOM) Manuscript Authorship Policy

Approved by the SOM Council on January 27, 2016

A manuscript author must meet the following criteria:

- Substantial contributions to conception and design, acquisition of data, analysis or interpretation of data

and/or
- Substantial contributions to drafting reviewing and/or revising the content of the publication for important intellectual content

and
- Must consent to be an author on the manuscript and provide final approval of the version to be published

Participation based solely in the acquisition of funding, collection of data, or the editing/assembly of the text or illustrations does not necessarily justify authorship. Decision about authors and the order in which the names appear is determined by the lead author(s) who should consult with individual authors. In general, the sequence of authors is determined by relative contribution to the work and/or the traditions and conventions of the field.
