

Trouble with balance? Falls? Afraid of falling?

Three research studies investigating how and why people fall are

currently enrolling test subjects. We seek:

- Individuals 60-86 years old who have suffered an ischemic stroke and are able to walk
- Individuals 60-86 years old who are free from neurological conditions such as stroke and Parkinson's disease who have fallen two or more times in the past year
- Young healthy individuals 20-40 years old who have not fallen

For your participation you will receive

- A health evaluation and fall risk assessment
- Up to \$100 in compensation
- Free parking

Please call **410-605-7179** and mention "**BALRCH**"

These studies are being conducted in conjunction with the Veterans Health Administration VA Maryland Healthy Care System and the University of Maryland School of Medicine.
